This evidences we are narrowing the gaps in achievement and progress between FSM and non-FSM pupils. We now need to build on this quality work by ensuring that FSM pupils are making equivalent 'better than expected' progress to their peers. In order to do this, in 13/14 we will target our Pupil Premium Grant, based on published research (Sutton Trust), with the aim of increasing the number of FSM pupils making accelerated progress, and track the impact on this through the data.
